Flutter Developer skilled in developing cross-platform mobile applications. Proficient in REST API integration, SQLite, and State Management for optimal app performance. Committed to innovative mobile app solutions.

SKILLS

- Flutter
 - Dart
 - Firebase
 - MySQL
- MVC
 - Localization
 - REST API
 - JSON
- Google Maps
 - Notifications
 - Responsive Design
 - Testing
- Git & GitHub
 - Web Sockets
 - State Management
 - Agile

EXPERIENCE

- vativeApps**
Junior Flutter Developer

May 2024 - Present
REST APIs, WebSockets, Maps

 - Worked on social media and business related apps.
 - Integrated WebSockets for real-time communication and Google Maps for location services.
 - Implemented thermal printer integration supporting both Bluetooth and Network printers for receipt generation in POS applications.
 - Integrated push notifications for Android and IOs.
 - Developed localization features. and integrated REST APIs across multiple mobile apps.
- Plural Dynamics**
Flutter Developer Intern

January 2024 - April (4 Months)
REST API, GetX

 - Customized UI of an E-commerce App and Integrated 15+ API endpoints
 - Utilized clean architecture using the MVVM design pattern.
 - Maintained efficient state management using GetX.

PROJECTS

- Rider App (Cravo)**

 - Implemented WebSockets for continuous location updates based on distance.
 - Integrated Google Maps for seamless navigation to restaurant and customer locations.
 - Developed real-time push notifications for order updates.
 - Created in-app chat functionality for communication with customers and support.
- Food Delivery App (Cravo)**

 - Enabled multilingual support by localizing the app.
 - Integrated WebSockets to track the the rider's location in real-time.
 - Implemented Google Maps for enhanced navigation.
 - Developed a local notification system for order updates.
- MinoLive App**

 - Resolved messaging and call functionality bugs.
 - Implemented localization for the application.
 - Integrated push notifications for multiple features (Posts, Chat, Calls, Comments).
- Chat-App**

 - Developed a real-time chat application using Flutter and Firebase.
 - Integrated Firebase Cloud Firestore for storing chat messages.
 - Implemented Firebase authentication for secure user login with Google Sign-In.
 - Used Firebase Storage to handle and store media files.
 - Employed Provider for efficient state management and performance optimization.
- E-MakeUp**

 - Built an e-commerce app to browse and purchase makeup products.
 - Integrated REST API to retrieve and display makeup products dynamically.
 - Implemented SQLite database for secure local storage of user data.
 - Leveraged Provider for optimized state management and better performance.
 - Integrated Firebase authentication to enable secure user login.

EDUCATION

Mehran University Of Engineering And Technology Jamshoro (MUE)

November 2023

B.E. in Software Engineering | [Link to all courses](#)

Relevant Courses: Mobile Application Development (Flutter), OOP, Database Systems,
Data Structures And Algorithms, Software Project Management, Programming Fundamentals

Languages: English (Professional Working Proficiency), Urdu (Bilingual Proficiency) .
